| **Category:** | | | **Estimated time:** | 0.00 hour |
| **Target version:** | Sprint 29 Feb | | | |

### Description

## WFschemaDelete()

### Request

```
{
    "slice": 5,
    "app": "retailsales",
    "class": "garmentitems"
}
```

where the tuple (slice,app,class) identify one schema in a realm.

### Processing

The calling user must have schema capability for this app, and must belong to the same realm as the record being deleted.

The system will check whether there are any workflows in the ruleset table whose (slice,app,class) match this record. If this is true, then the call will fail. Else, the record will be deleted.

### Response

If the call is successful, no data will be present in the response.
