

LogHarbour: logging - Task #18071

Go lib: modify Logger.NewLogger() to accept a token

01/03/2024 06:12 PM - Shuvam Misra

Status:	New	Start date:	
Priority:	Normal	Due date:	15/03/2024
Assignee:	Sachin Divekar	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:	Sprint 12 Apr		
Description			
The Logger.NewLogger() function creates a new Logger instance. This function now needs to accept a write token and store it in the Logger object. So, modify the Logger struct to add a new field for the token, and modify the Logger.NewLogger() function to accept this as a parameter.
