

Rigel: config - Task #19071

UI: Implement misc feature

17/05/2024 05:05 PM - Adarsh Shukla

Status:	Closed	Start date:	17/05/2024
Priority:	Normal	Due date:	
Assignee:	Adarsh Shukla	% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:			
Description 1. Add validation for the API response. If a required field is empty or not received from the API, the frontend should reject the response and display an error message. 2. Implement basic error handling. For example, if the API returns a response indicating that data was not found, display this message in a toast notification on the UI.			

History

#1 - 17/05/2024 05:06 PM - Adarsh Shukla

- Status changed from New to In Progress

#2 - 18/05/2024 10:57 AM - Adarsh Shukla

- % Done changed from 0 to 10
