

Alya - Task #19867

Add IsAlive() to to InitBlock interface and use it in block processing

30/05/2024 10:38 AM - Sachin Divekar

Status:	In Progress	Start date:	30/05/2024
Priority:	Normal	Due date:	
Assignee:	Aniket Shinde	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:			
Description			
InitBlock object will have an IsAlive() method, which will check whether the objects inside the initblock are valid. This is supposed to be implemented by the application and not Alya batch framework.			
<ul style="list-style-type: none">• add the function to the InitBlock interface• modify jobmanager to call IsAlive() and if it returns false call initblock.Close() and then call initializer.Init()• remove initblock.Close() from the jobmanager where it closes initblock after it finishes processing a block of rows
