

Alya - Task #26344

Integrate APISIX metrics and logs with ServerSage and LogHarbour

24/03/2025 11:45 AM - Sachin Divekar

Status:	New	Start date:	24/03/2025
Priority:	Normal	Due date:	
Assignee:	Sachin Divekar	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:			
Description			
Configure APISIX to export metrics and logs to ServerSage and LogHarbour. This includes:			
<ul style="list-style-type: none">• hits count displayed on a timeline• success and failure counts displayed separately on a timeline• alerts triggered for:<ul style="list-style-type: none">◦ each failure event◦ rate throttling events• attributes to include for each hit in ServerSage:<ul style="list-style-type: none">◦ source IP address◦ web service name or URL◦ username extracted from JWT			

History

#1 - 24/03/2025 01:22 PM - Shuvam Misra

The description appears to be incomplete. Can you please complete it? I want to track

- hits count on a timeline
- success/failure counts on a timeline
- each failure to be an event triggering an alert
- for each hit, I want to see the following as attributes in ServerSage:
 - source IP
 - web service name or URL
 - username from the JWT
- rate throttling events as alerts
